

Make Stellar Dental Care An Important Part of Your Healthcare Team

Whether you are 8 or 80, your oral health is important. Most Americans today enjoy excellent oral health and are keeping their natural teeth throughout their lives; however, cavities remain the most prevalent chronic disease of childhood.

Some 100 million Americans fail to see a dentist each year, even though regular dental examinations and good oral hygiene can prevent most dental disease. Many people believe that they need to see a dentist only if they are in pain or think something is wrong, but regular dental visits can contribute to a lifetime of good oral health.

In our on-going efforts to better serve our patients, Stellar Dental Care is pleased to offer Concious Sedation Dentistry.

Five Convenient Offices To Serve You:

Conscious Sedation for Surgical Dental Procedures

Conscious Sedation for Surgical Dental Procedures

Does the thought of going to the dentist bring on anxiety?

You're not alone.

Conscious sedation is a safe and effective way to relieve that fear!

How Conscious Sedation Works for You

Conscious sedation, often referred to as twilight sedation, is a combination of medicines to safely help you relax (a sedative) for dental procedures. You will receive the medicine through an intravenous line (IV, in a vein). You will begin to feel drowsy and relaxed very quickly.

You will probably stay awake and will most likely not remember most of the dental procedure. Local anesthesia (Novocain) still has to be given in order to alleviate the pain. Sedation is not a replacement for getting Novocain.

Conscious sedation lets you recover quickly and return to your everyday activities soon after your procedure.

The dentist and assistants will monitor you during the procedure to make sure you are healthy and safe. The team will stay with you at all times during the procedure.

You may fall asleep, but you will wake up easily to respond to people in the room. You may be able to respond to verbal cues. After conscious sedation, you may feel drowsy and not remember much about your procedure.

Talk with your Stellar Dental Care Professional for complete details about Conscious Sedation Dentistry.

Candidates for Sedation Dentistry

Conscious sedation is not for everyone. A consultation is required in order for Stellar Dental Care to be sure that you are a good candidate for conscious sedation. The medicine may not take effect or may not be safe for some people. You must be in good mental and physical health. You must not be taking any conflicting medications.

During the consultation be sure to tell your Stellar Dental Care Professional:

- If you are or could be pregnant
- What medicines you are taking, even drugs, supplements, or herbs you bought without a prescription
