The Clear
Alternative
to Braces

The Clear Alternative to Braces

Your Custom Treatment Plan

Your doctor will use a scanner such as the iTero® digital scanning system to create fast, precise 3D digital images of your teeth, or may take physical impressions.

Then your doctor will map out a precise treatment plan, including the exact movements of your teeth and how long your treatment will be.

Your Invisalign Clear Aligners

Your custom-made aligners will be made of our proprietary SmartTrack® material. They're virtually invisible, so most people won't even notice you're wearing them during your teeth straightening.

Wear your Invisalign clear aligners 20 to 22 hours a day for the best results, taking them out to eat and to brush and floss.

Your progress

As you wear each set of aligners, your teeth will gently and gradually shift into place. Your doctor may recommend that you begin wearing a new set of aligners every week and schedule check-ups every six weeks or so.

At every stage you'll be able to see your progress and imagine how far your new smile will take you.

Taking care of your new smile

When your treatment is complete, your doctor may discuss using a Vivera® retainer. Vivera retainers are custom-made using the same state-of-the-art technology as Invisalign clear aligners.

Your Invisalign® clear aligners are custom-made for you. The aligners are virtually invisible and fit snugly over your teeth.

Each aligner shifts your teeth slightly, moving them horizontally and vertically and even rotating them when needed. Your aligners are engineered to use the right amount of force in the right place at the right time.

When you change to the next set of aligners (typically every week) your teeth gradually move into position, following a custom treatment plan mapped out by your doctor.

Only Invisalign clear aligners are made of proprietary, multilayer SmartTrack® material to gently shift your teeth into place.

Choosing Invisalign treatment is an important dental and financial decision, so it's essential that you review the total Invisalign process with your Stellar Dental Care Professional.

At your initial consultation, your doctor will discuss your needs and evaluate whether Invisalign treatment is right for you.

The Invisalign® Advantage

While the results may appear the same—a confident, beautiful smile—when you stop and actually compare Invisalign versus braces, the advantages become quite apparent. See why more than 5 million people have trusted the world's most advanced clear aligner system to achieve their best smile.

	Invisalign Clear Aligners	Other types of braces	Other Clear Aligners
